### DISCOVERY DAYS: JUNIOR DETECTIVES

Put your mind to work with a day of mystery and science at the Perot Museum of Nature and Science in conjunction with “The International Exhibition of Sherlock Holmes.” Kids can help solve a museumwide mystery, discover spy technology, try chromatography (a method scientists use to separate organic and inorganic compounds so they can be analyzed) and use deductive reasoning to solve a case. There will be experiments, performances and more. This is part of the Discovery Days series, held the second Saturday of each month.

March 14 from 10 a.m. to 4 p.m. at the Perot Museum of Nature and Science, 2201 N. Field St., Dallas. Activities are included in the price of admission: \$15 for adults, \$10 for children 2-11, \$12 for children 12-17 and seniors 65 and older, free for children under 2. These tickets sell quickly; reservations are recommended. (“Sherlock Holmes” tickets cost extra; see the website for pricing.) 214-428-5555. [perotmuseum.org](http://perotmuseum.org).

Ever wondered what it’s like to be a crime scene investigator? Well, now you can find out for a day. You’ll look for clues to who set a fire at the circus, who poisoned the ambassador at a state dinner and more. To solve the crimes, you’ll need to identify forged documents, read eyewitness accounts and analyze fingerprints. After solving the crimes, check out The Sixth Floor Museum itself.
